Scafe de lumină

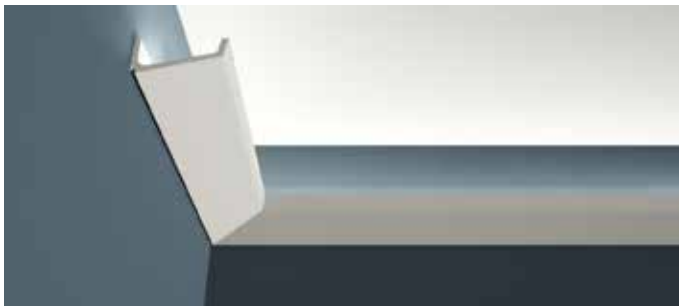

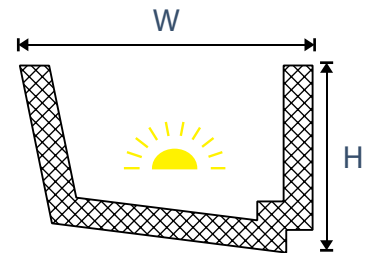

Dacă ai fi știut că scafele decorative colectează și dispersează lumina într-un spațiu, probabil că le-ai fi integrat deja în proiectul tău de amenajare. Aceste profile se pot monta pe marginea scafelor de gips-carton deja existente sau direct pe perete, formând astfel un cordon de lumină indirectă. Uneori, aceste profile decorative pot avea rolul de a masca anumite țevi sau cabluri inestetice.

Cornișe

O să îți divulgăm câteva secrete ale unui proiect de amenajări exterioare. Atunci când folosești cornișe exterioare, peretele este protejat împotriva mușgaiului la îmbinarea lui cu acoperișul.

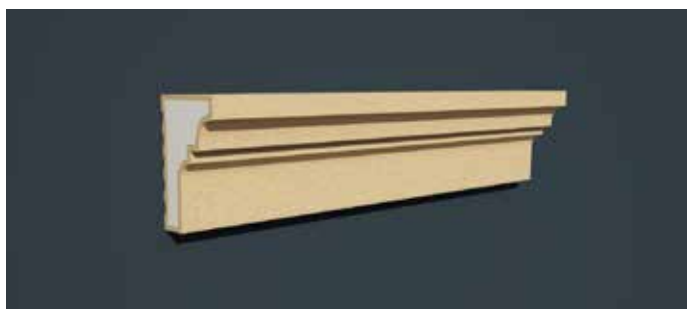

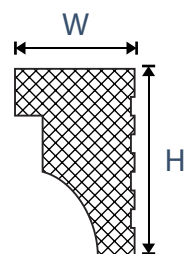

Frumusețea exterioară a casei este mai greu de menținut decât cea interioară, deci și calitatea finisajelor folosite este vitală. Dacă alegeți gama noastră de cornișe de exterior, nu compromiteți calitativ exteriorul clădirii iar vizual fatada va arata spectaculos.

Solbanc

La următoarea rafală de ploaie vei zâmbi mulțumit. Așa i se întâmplă oricărui client care a folosit profilele produse de noi. Solbancurile noastre preiau cu succes apa de pe suprafața pervazului, iar picurătorul o împiedică să se scurgă direct pe fațadă.

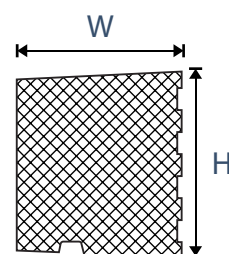

Poți avea încredere în calitatea produselor și în capacitățile noastre de montaj. Știm că se montează în partea inferioară a ferestrei, iar deasupra solbancului se montează blatul ferestrei ce poate fi din marmură, PVC, tablă etc.
